

Product data onboarding specialist

International

Function and key activities

itsme is redesigning its processes from a future minded and customer centric point of view. This results in internationalizing and centralizing the onboarding and maintenance of product data. Therefore we introduce a new function known as the product data onboarding specialist. In this role you are responsible for obtaining the right, up-to-date and complete product information for all the suppliers of the itsme group. Based on this information our customers should have the best product data available based on rich product information and assets, which enables them to succeed in their core business.

- You are responsible for, and therefore manage, the total process of obtaining product data from suppliers;
- Your focus is on the core brands within the core product groups;
- Initially the priority for obtaining product data will be set based on the needs of our customers and the resulting marketing initiatives;
- Find the right contact person and set up meetings to convince and contract international suppliers and/or manufacturers regarding the completeness and the quality of the data they supply;
- You are responsible of harmonizing the onboarding process of data;
- You will identify and solve possible onboarding bottlenecks;
- Initial check of the received data on correctness and completeness. And co-act with the suppliers to reach the required standard for data onboarding in order to enable the Product Information Team to efficiently process and maintain product data;
- Continuously analyze, optimize and harmonize the onboarding process of product data;
- Your aim is to give itsme a competitive advantage resulting from the continuous enrichment of the product data;
- Pro-active development based on new technical possibilities (such as shop-in-shop configurators);
- Open mind for additional data driven services/opportunities.

Experiences and competences

- Bachelor degree in for example Business and IT Management
- Several years of relevant experience in data management
- Experience within and/or affinity with the OEM and/or MRO technical and/or electro technical B2B environment
- Excellent English and German skills
- Strong feeling of responsibility
- Good communication skills
- Result-oriented
- Perseverance
- Think outside the box
- Analytical

itsme

it's me looking for you
